

## Second Announcement and Call for Papers:

## Workshop of the Working Group „Bayes Methods“ (International Biometric Society, German Region) University of Göttingen, 06-07/12/2018

### Bayesian methods in the development and assessment of new therapies

#### Workshop Objectives

The aim of the workshop is to provide a space for presentations and discussions of recent developments in the application of Bayesian methodology in early pharmaceutical research and health technology assessment.

Presentations on the following topics are particularly welcome:

- Preclinical research, early clinical phases
- Health technology assessment
- Prognosis, prediction, biomarkers
- Meta-analysis, decision making
- Censored or incomplete data, measurement error

#### Program

##### Invited presentations:

- Ralf Bender (IQWiG): *Applications of Bayesian methods in health technology assessment*
- Thomas Jaki (Lancaster University): *Multi-objective dose-finding*
- Heinz Schmidli (Novartis): *Bayesian applications in drug development*
- Sibylle Sturtz (IQWiG): *Meta-analysis using Bayesian methods: Applications in systematic reviews*

##### Tutorial:

- Sebastian Weber (Novartis), Heinz Schmidli (Novartis):  
*Use of historical data: Methods, applications and implementation with the R package RBeST*

##### Invited discussant:

- Norbert Benda (BfArM)
