

Innovative medicines for people and animals have for more than 130 years been what the research-driven pharmaceutical company Boehringer Ingelheim stands for. Boehringer Ingelheim is one of the pharmaceutical industry's top 20 companies and to this day remains family-owned. Day by day, some 50,000 employees create value through innovation for the three business areas human pharmaceuticals, animal health and biopharmaceutical contract manufacturing. In 2016, Boehringer Ingelheim achieved net sales of around 15.9 billion euros. With more than three billion euros, R&D expenditure corresponds to 19.6 per cent of net sales.

Regional Head of Statistics (Europe)

This position could be either filled in Biberach or Ingelheim

The Boehringer Ingelheim (BI) Head of Statistics, Region Europe (EU) will direct the activities of BI statistics EU, providing key input for international drug development, international registration, market access, drug safety and the development of new indications for marketed products to ensure that statistical input in clinical development programs meets scientific, regulatory, quality and commercialization requirements.

We are looking for a candidate with strong interest in people and collaboration. The right candidate will be able to interact effectively within the organization, will show excellent negotiation and communication skills, will be agile, self-motivated, creative and customer oriented with a pro-active mindset and a can-do attitude.

If you are convinced that innovation is the key to improving patients' lives

Then you're one of us.

Regional Head of Statistics (Europe)

Tasks & responsibilities

- You will set direction and serve as functional line manager of the Clinical Statistics teams as well as the Non-Clinical Statistics teams in Biberach and Ingelheim.
- In your role you will report to the Regional Head of Biostatistics & Data Sciences (BDS) and play a key role in the regional leadership team.
- As the Regional Head of Statistics you will collaborate with your peers in Statistical Programming and Data Management to optimally support the global clinical development projects and trials.
- You will work in close collaboration with Global Head of Statistics and act as a key member of the global Heads of Statistics Group, to strategically define and maintain global standards, processes and roles for statistics.
- As part of the Heads of Statistics group, you will also set the strategic direction for the role of BI statistics in global clinical drug development, regulatory submissions and life-cycle management activities.

Requirements

- PhD or MSc in Statistics or Mathematics
- Experience in managing a Statistics leadership role and document excellent leadership results
- Several years of experience as global Project Statistician in a pharmaceutical company and demonstrated successful statistical leadership for major early- and late-stage projects
- Solid and broad knowledge of statistical methods for designing and analyzing clinical trials, experience with the global drug development process and interactions with regulatory authorities
- Experience with pricing and reimbursement agencies are considered additional assets
