

ERGOMED plc is a globally operating company providing services in clinical and drug research. Within this framework the ERGOMED CDS GmbH in Cologne is responsible for the aspects of Data Management and Statistics for all international projects.

For the growth of our team in Cologne we are looking for a

Statistician (m/f) (full-time)

for immediate hire.

Your responsibilities:

- Cooperation on statistical planning, analysis and reporting of clinical studies in all phases of development
- Supervision and collaboration with statistical programmers and data managers
- Choice of appropriate statistical methods and their adequate description in statistical analysis plans
- Interpretation of statistical results in clinical research reports
- Statistical review of study protocols and reports and statistical outputs
- Participation in interdisciplinary meetings in English

Your profile:

- Academic degree in statistics, mathematics or specialization in quantitative methods in a natural science
- Solid methodologic knowledge of statistical methods
- Capability and willingness to read and utilize recent statistical literature
- Fluency in English, written and spoken
- Basic knowledge in the areas of databases, SAS programming and MS-Office
- Logical thinking, structured, targeted way of working
- Interested in cooperating in multidisciplinary, international teams
- Previous experience in clinical studies is an advantage, but not a prerequisite

Our offer:

- Pleasant working environment within a team of highly motivated specialists
- Challenging and versatile tasks in the area of international drug development
- Scientific working atmosphere and regular professional training
- Professional IT support for the performance of all tasks
- Competitive salary
- Excellent professional development opportunities in a globally operating company
- Thorough training on the entire spectrum of the drug development process and statistical methods in clinical studies for recent graduates
