Senior or Principal Statistician

Work on a variety of clients and projects on Veramed’s reporting environment, and gain exposure to some exciting clinical studies, while feeling valued and supported in your day-to-day work.

We are looking for an ambitious Statistician with a passion for leading a Statistics & Programming team to deliver high quality work across an exciting portfolio of projects and therapeutic areas. This role can be based in Germany, Spain, Ukraine, USA or the UK and we can consider Senior and Principal level roles.

As a mid-size contract research organisation (CRO) Veramed prides itself on two key areas: providing the highest quality statistics and programming consultancy for its clients, and giving its employees an industry leading working environment with support and training for career growth.

Whilst also working closely with a pharma study team, you will deliver quality products to their specifications, within the dynamic, supportive environment of a passionate CRO with quality and work-life balance at its heart.

We find that keeping our staff happy and supported helps us deliver the best work possible.

KEY RESPONSIBILITIES:

As a Lead Statistician you will be responsible for managing a team of Statisticians and Programmers to produce and QC high quality products to client specifications within the agreed timelines and budget. You will be the primary point of contact for the client.

Below is a summary of the types of tasks you will be carrying out on a daily basis. As with many roles at Veramed, you have the opportunity to shape their direction dependent on client needs and your own career aspirations.

STATISTICS & PROGRAMMING:

- Author/review the Statistical Analysis Plan (SAP).
- Review ADaM dataset & TFL specifications.
- Identify data and standards issues and resolve or escalate as appropriate.
- Perform complex statistical analyses.
- High level review of outputs to ensure quality.

DAILY INTERACTIONS:

- Build an effective collaborative relationship with the client, managing their expectations, whilst being the primary point of contact. Become their go-to person to provide stats consultancy advice.
- Lead the internal Veramed team to deliver on time, to budget, high quality work.
- Liaise with internal management to define scope and support proposal development.
- Provide support and mentoring for more junior statisticians on the team.
OPPORTUNITIES FOR:

- Presenting at conferences.
- Line management and peer mentoring.
- Business process improvements and internal training.
- Contributing to initiatives that consider employees, the environment and our local communities as part of our B Corp accreditation.
- Taking ownership of a project and bringing forward new ideas and processes for implementation.
- Sharing scientific, technical and practical knowledge within the team and with colleagues.

WHAT TO EXPECT:

- A warm, friendly working environment in which to thrive both personally and professionally.
- A supportive, open-door management policy that will aid in your development and provide you with the tools to take your career to the next level.
- A truly unique CRO that’s doing something different when it comes to managing staff, projects and building relationships in the industry.
- The ability to own your role and develop your skills and experience.

MINIMUM QUALIFICATION REQUIREMENTS:

- MSc or PhD in Statistics/Biostatistics (or equivalent).
- From 5 years of relevant industry experience. We look to map your level of experience to the roles available.

ADDITIONAL REQUIREMENTS:

- Understanding of clinical drug development process, relevant disease areas, endpoints and different study designs.
- Awareness of industry and project standards & ICH guidelines.
- Interpersonal/teamwork and communications skills for effective interactions.
- Proficiency in data handling using SAS or other statistical software (e.g. R).
- Team leadership skills with a focus on results for timely and accurate completion of competing deliverables.
- Demonstrated problem solving ability and attention to detail.
- Ability to work independently and as part of a team.

If you are an effective leader with the experience to diligently manage a study team whilst liaising with multiple stakeholders, this role could be for you.
