28. / 29. OCTOBER 2019
ACADEMIA MEETS INDUSTRY

Connect – Collaborate – Create

The aim of this workshop is to provide a meeting ground for academic researchers, statisticians in the pharmaceutical industry, as well as BSc, MSc and PhD students with an interest in statistical research.

The meeting will include short talks featuring possible topics for BSc, MSc and/or PhD projects as well as possibilities for collaborative research projects. Special emphasis is given to the "meet and greet" pin board sessions allowing established statisticians to extend their network of possible future collaborators. The "meet and greet" sessions also provide an opportunity for students and early career researchers to get to know possible supervisors. The workshop will close with an open discussion on talent attraction.

Talks and profiles for the pin boards should feature a brief introduction of the presenter, a short overview of their organization, and a description of possible topics for BSc/MSc/PhD/internships projects and/or possibilities to collaborate.

If you are interested in giving a short talk and/or display a profile on the pin boards, please email either Werner Brannath or Cornelia Ursula Kunz until 01 September 2019.

	Monday, 28 Oct 19	Tuesday, 29 Oct 19
9:00-10:40		Short talks
10:40-12:00		Meet and greet pin board
