An: Biometrische Gesellschaft <biometrische-gesellschaft@tiho-hannover.de>

Liebe Kolleginnen und Kollegen,

mit diesem e-Rundschreiben 115 möchte ich Sie informieren über:

1) Der Bewerbungsschluss für die **Young Statisticians** Session auf der **DAGStat2016** ist der 15. November 2015. Die Einreichungsfrist für andere Abstracts ist der 1. Dezember 2015.
Mehr zum **Programm** im Anhang.

2) Die DFG-Wahl geht noch bis zum 23. November 2015. Es kandidieren mindestens folgende Mitglieder der IBS-DR (*Dank Vorschlagsrecht der IBS-DR),
für Fach 207-02 Pflanzenbau und Agrartechnik (3 Sitze):
Herr Piepho*
für Fach 205-01 Epidemiologie, Medizinische Biometrie, Medizinische Informatik (3 Sitze):
Herr Kieser*, Herr Mansmann*, Frau Pigeot-Kübler, Frau Steindorf, Herr Wagenpfeil.

Die Wahlunterlagen sollten allen Wahlberechtigten, den promovierten Wissenschaftlern an wissenschaftlichen Einrichtungen, schon vorliegen. Wenn nicht, fragen Sie bitte Ihre Wahlstelle.

3) **Stochastik-Tage**, 1.-4. März 2016 in Bochum. Homepage

4) **AgroStat** 2016, 21.-24. März 2016 in Lausanne, Schweiz. Homepage

5) Gemeinsame **Jahrestagung** von **GMDS**, **DGEpi** und IEA-EEF: Health - Exploring Complexity: An Interdisciplinary Systems Approach,
28. August bis 2. September 2016 in München. hec2016.eu

Viele Grüße

Reinhard Vonthein
Schriftführer IBS-DR

Third Call for Papers of the 4th Joint Statistical Meeting of the Deutsche Arbeitsgemeinschaft Statistik "Statistics under one Umbrella" (DAGStat 2016)

We cordially invite you to register for the 4th Joint Statistical Meeting of the Deutsche Arbeitsgemeinschaft Statistik (DAGStat 2016) from March 14 to 18, 2016, in Göttingen.

The deadline for submission of abstracts is December 1, 2015.

The deadline for the Young Statisticians Session is November 15, 2015,

please distribute this information to suitable Master and early PhD students. Under the motto "Statistics under one Umbrella" the planned conference program contains contributions of all areas of statistics and many applications of statistical methods. Scientific exchange between the participating societies is one main aim of the conference. This is reflected by embedding three important annual meetings, the 62. Biometrisches Kolloquium (German Region of the International Biometric Society), the 40. Jahrestagung der Gesellschaft für Klassifikation (German Classification Society) and the Pfingsttagung der Deutschen Statistischen Gesellschaft (German Statistical Society).

For the conference the following speakers agreed to give a plenary talk.

>   Aurore Delaigle (University of Melbourne)
>   Hans Rudolf Künsch (ETH Zürich)
>   Simon Thompson (University of Cambridge)
>   Adalbert Wilhelm (Jacobs University Bremen)

Tutorials will be offered about the following topics

>   Event Data Analysis (Robin Henderson)
>   Evidence Synthesis (Guido Knapp, Gerta Rücker, Guido Schwarzer)
>   Copulae in Practice (Ostap Okhrin)
>   Integer-valued Time Series (Christian Weiß).

Special topics and invited speakers of the conference will be:
 * Rosemary Bailey (Design of Experiments)
 * Andreas Buja (Visualisation and Exploratory Data Analysis)
 * Ying Cheng (Psychometrics)
 * Gerda Claeskens (Mathematical Statistics in Life Science)
 * Sandrine Dudoit (Statistics of High Dimensional Data)
 * Peter Goos (Statistics in Natural Sciences and Technology)
 * Patrik Guggenberger (Empirical Economics and Applied Econometrics)
 * Marc Hallin (Robust and Nonparametric Statistics)
 * Larry Hedges (Research Synthesis and Meta Analysis)
 * Georg Heinze (Education for Statistics in Practice)
 * Robin Henderson (Survival and Event History Analysis)
 * Joop Hox (Multilevel and Panel Data Analysis)
 * Beat Hulliger (Official Statistics and Survey Statistics)
 * Thomas Lengauer (Bioinformatics)
 * Marloes Maathuis (Graphical Models and Causal Inference)

eRundschreiben 115

imap://mail.imbs.uni-luebeck.de:993/fetch>UID>/INBOX>41037...

* Masahiro Mizuta (Cluster Analysis and Classification)
* Byron Morgan (Statistics in Agriculture and Ecology)
* Morten Ørregaard Nielsen (Time Series Analysis)
* Edzer Pebesma (Computational Statistics and Statistical Software)
* Jose M. Pena (Machine Learning)
* Lawrence Phillips (Methods for Risk and Benefit Assessment)
* Stuart Pocock (Statistics in Clinical and Preclinical Research)
* Bertram Raum (Destroying data as a means of data protection - is it ethical?)
* Yves Rosseel (Structural Equation Modelling)
* Håvard Rue (Penalized and Regularized Regression Analysis)
* Olivier Scaillet (Statistics in Finance)
* Max Welling (Big Data and Data Science)

Online registration and submission of abstracts is possible via the conference homepage
http://www.uni-goettingen.de/dagstat2016
Please note that the Cebit fair in Hannover will take place at the same time as DAGStat 2016, so we recommend an early booking for accommodation. A booking tool and a link to the Göttingen tourismus office, located on the website under "accommodation", are the recommended tools to organize the accommodation booking. Also, information about private and alternative room reservations can be found here.

We are looking forward to welcoming you in Göttingen next year,
Thomas Kneib and Henriette Irmer, on behalf of the local organizing committee.
