

Senior Biostatistician (m/f/d) in Bremen

We are expanding our team and are looking for a dynamic **full time Senior Biostatistician** who wants to join a young and motivated group of Biostatisticians in our **headquarter in Bremen**, and who is open to taking responsibility for projects and fellow team members alike.

The responsibility of a Senior Biostatistician is to manage all statistical aspects which occur in the frame of a clinical trial – from initial consultation regarding study concepts, to providing input into study protocols and writing SAPs, to conducting the analysis and summarizing the results. In this context, we are looking for a candidate who understand the importance of the following:

- Manage clinical trial databases including establishment of qualification control tools and coordination of study processes
- Taking responsibility for the communication with the Sponsor and your colleagues regarding all statistical (and sometimes non-statistical) questions within a project
- Mentoring junior colleagues regarding statistical questions
- Having the confidence to represent statistical concepts in front of clients and presenting key information in an understandable manner to non-statisticians
- Being able to think outside the box and finding creative solutions to statistical problems given limited resources

Your profile:

- Master's degree (MSc.) or PhD in Statistics or Biostatistics
- 3+ experience as Biostatistician in clinical research (CRO or Sponsor) is a strong plus, and must-have for statisticians without PhD
- Excellent communication and self-management skills
- Excellent understanding of regulatory requirements of clinical trials, with a particular focus on statistical requirements
- Excellent spoken and writing English (German is a plus)
- Good command of SAS®

We offer:

- An independent, diverse and interesting area of responsibilities and an excellent working environment in the immediate vicinity of the University of Bremen
- A young and innovative corporate culture and management, with a clear path to personal development and the opportunity to take responsibility not only within projects, but also within the company
- Support and advancement in individual personal and professional development
- Modern and performance-oriented remuneration systems
- Flexible working hours
- Occupational company pension scheme
- Discounted employee gym membership
- 30 days of holiday
